

Manchester Free Software (MFS)

The purpose of Manchester Free Software is to promote the Free Software philosophy.

Group meetings are the third Tuesday of the month. We normally have a talk with questions and then continue discussions informally at a nearby pub.

In addition, MFS organises and helps out with special events in order to promote the Free Software philosophy. If you have an event you would like us help out with then please get in contact.

We are on LibrePlanet, the global network of Free Software activists, where you can find out more:
